

CHADALAVADA TRINAY SAI

Data Analyst | SQL • Power BI • Python • Excel

+91 9291500737 | <mailto:thrinaychadalavada@gmail.com> | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Computer Science student (JNTUK, 2027) with hands-on experience in SQL, Power BI, Excel, and Python for data analytics and reporting. Built interactive dashboards, performed data cleaning and transformation, and analyzed large datasets to generate KPI-driven business insights. Skilled in T-SQL, DAX, Power Query, and data storytelling, with expanding knowledge of Python, Pandas, NumPy, Matplotlib and Seaborn. Seeking a Data Analyst internship to apply analytical and problem-solving skills in real-world business environments.

EDUCATION

B. Tech Computer Science and Engineering

2023 – 2027

Jawaharlal Nehru Technological University Kakinada (JNTUK) | CGPA: 7.6 / 10.

TECHNICAL SKILLS

Languages & Querying	SQL (T-SQL), Python, Pandas
BI & Visualization	Power BI, DAX, Power Query, Excel, Matplotlib, Seaborn
Databases & Data Handling	SQL Server, SSMS, Data Cleaning, Data Transformation, Window Functions
Tools & Platforms	Jupyter Notebook, VS Code, Git, GitHub

PROJECTS

Retail Analytics System | SQL Server, Power BI, Excel

Mar 2026

- Analyzed 99K+ retail orders using SQL Server and Power BI to identify revenue trends, seller performance, customer behavior, and delivery KPIs across multiple business dimensions.
- Performed RFM customer segmentation and sales analysis using CTEs, window functions, and data modelling techniques, identifying top-performing customer segments contributing over 60% of total revenue.
- Delivered a 3-page Power BI dashboard with DAX time intelligence, drill-through, and waterfall visuals supporting order trend, seller KPI, and revenue analysis across 4 Excel-integrated reporting models.

Data Warehouse System | SQL Server, ETL, Data Modelling

Feb 2026

- Built a star-schema warehouse model integrating CRM and ERP datasets to support centralized reporting and analytical querying across business entities.
- Developed Bronze-Silver-Gold transformation layers to organize raw, cleaned, and business-ready datasets for downstream Power BI reporting and ad-hoc SQL analysis.

Weather & Air Quality Analytics Dashboard | Power BI, API Integration

Dec 2025

- Built an interactive Power BI dashboard with 15+ DAX measures, dynamic KPI cards, forecast comparisons, and AQI classification logic for real-time environmental monitoring and trend analysis.
- Designed a structured data model with automated transformations and calculated metrics to support multi-dimensional weather and air quality reporting.
